

45. (NEW) The system of claim 42, wherein the network is the Internet.
46. (NEW) The system of claim 42, wherein the context data comprises data pertaining to a master patient index (MPI).
47. (NEW) The system of claim 42, wherein the context data comprises coded values.

REMARKS

Kindly enter this preliminary amendment before first action on the merits. Claims 1-11 were previously pending in this application. By this preliminary amendment, Applicants have amended pending claim 8 and added new claims 12-47, to better claim the invention. As a result claims 1-47 are pending for examination with claims 1, 8, 12, 30, 39 and 42 being independent claims.

If this paper is not considered timely filed and if a request for an extension of time is otherwise absent, Applicant hereby requests any necessary extension of time. If there is a fee occasioned by this response, including an extension fee, that is not covered by an enclosed check, please charge any deficiency to deposit account No. 23/2825.

Respectfully submitted,
Robert Seliger, Applicant

MARKED-UP CLAIMS

8. (Amended) A context management web [site] server accessible through a network, comprising:

a computer memory in which is stored a set of instructions defining a context manager accessible to managed applications through the network; and

a computer memory in which is stored a set of instructions defining a context vault accessible to the context manager.
